SUMMARY

Computer Science and Engineering student with hands-on experience in full-stack web development and mmWave radar-based embedded systems. Skilled in building scalable web applications, processing sensor data, and developing real-time sensing solutions using modern software and embedded technologies. Passionate about creating impactful engineering solutions through full-stack development, intelligent sensing, and system design.

EDUCATION

Bachelor of Computer Science and Engineering 2024 - Present
National Engineering College, CGPA: 8.68

SKILLS

Languages : Java, Python, JavaScript, SQL
Frameworks & Libraries : Java Springboot, Node.js, Express.js
Database : MySQL, Mongo DB
Tools : Git, Linux, Postman, n8n automation
Embedded & Radar: TI mmWave Radar, UART Communication, Firmware Flashing, TLV Frame Parsing

EXPERIENCE

MMWave Radar Intern - Mistral Solutions Pvt. Ltd. Jun 2025 - Present

• Worked with TI mmWave radar platforms to configure firmware, acquire sensor data, and validate radar system functionality.
• Developed Python-based utilities for parsing and processing TLV radar frames into structured data for radar data analysis.
• Contributed to the development of a radar-based industrial safety monitoring solution (Vigil Sense) for real-time human detection and workplace awareness.

PROJECTS

NEC - CBCS Jun 2026 - Present

- Developed a comprehensive Choice Based Credit System (CBCS) platform to manage students, subjects, semesters, course registration, and academic records digitally.
- TechStack: React.js, Node.js, Mongo DB, Express.js

Vigil Sense Apr 2026 - Jun 2026

- Vigil Sense is a real-time industrial safety monitoring system built using Python and mmWave radar technology. It detects, tracks, and visualizes human movement inside a factory environment to prevent accidents and enforce safety zones
- Tech Stack: Python, Serials, Numpy.

Club Management System Feb 2026 - Jun 2026

- Builtacentralizedplatformfor managing college clubs, events, member registrations, approvals, announcements, and participation tracking.
- Tech Stack: Java, Spring Boot, MySQL, REST API.

PaperHub Dec 2025

- Academic resource-sharing platform that enables students to upload, organize, search, and access previous year question papers and study materials efficiently.
- Tech Stack:n8n, JavaScript..

ACHIEVEMENTS

- Recognized with the Active Participation Award during the Mistral Internship Program for active involvement in technical learning and project activities.
- Recognized as a Notable Participant in the IIT Bombay FOSSEE-AAI Geospatial Mapathon 2025 (Edition V).
- Won 1st Place in Bug Smash Contest at Fiestaa'25, demonstrating strong debugging and problem-solving skills.
